Instructions for Use

**Product Description**
A dressing change system for vascular access device maintenance.

**Indications for Use**
A package that contains components used to maintain vascular access devices for patients that require a dressing change.

**Contraindications**
See component(s) IFU for any applicable contraindications.

**Warnings**
- See component IFU for any applicable warnings.
- Minimize catheter/tube manipulation while performing dressing changes.

**Precautions**
- Sterilized by ethylene oxide. Do not re-sterilize.
- Carefully read and follow all instructions prior to use.
- Only qualified healthcare practitioners should perform dressing changes.
- Examine the package carefully before opening to confirm its integrity and that the expiration date has not passed. The package is supplied sterile. Do not use if package is damaged, opened, or the expiration date has passed.

**Special Patient Populations**
See component(s) IFU for any applicable special patient populations.

**Adverse Reactions**
See component(s) IFU for any applicable adverse reactions.

**Instructions for Use**
- Ensure proper hand hygiene prior to beginning dressing change.
- Explain the procedure to the patient.
- Open the white wrap entitled “Removal” with the text right-side up for proper orientation.
- Ensure the package is opened on a clean surface.
- Don mask. Place additional mask on patient if desired.
- Orient patient and/or placement site (e.g. arm) for ease of access for dressing change.
- Apply underdrape.
- Use hand-sanitizer.
- Don clean gloves.
- Remove dressing from patient by pulling towards the insertion site.
- Remove securement device, if applicable, per manufacturer’s instructions for use while maintaining control of the catheter.
- Assess site for signs of infection or drainage. Take note of the external length of catheter.
- Remove and discard gloves.
- Open the blue wrap entitled, “Application” with the text right-side up for proper orientation.
- Perform hand hygiene by applying second packet of hand-sanitizer.
- Don sterile gloves using sterile technique.
- Cleanse the patient’s skin with antiseptic solution.
- Allow antiseptic to completely air dry.
- Apply skin protectant, if applicable, to area larger than the securement device anchor pad, allowing it to completely air dry.
- Apply the securement device, if applicable, to (1) PICC/CVC then (2) patient’s skin.
- Apply antimicrobial dressing, following the manufacturer’s instructions for use.
- Apply transparent dressing to cover the insertion site and catheter bifurcation.
- Apply pre-cut securement tape strip under the extension legs and over the dressing border.
- Label the dressing with date and initials.
- Discard supplies.
- Remove gloves and wash hands, then remove mask.
- Document procedure in patient record.
