PowerPICC® SOLO™ catheter is a universal catheter solution designed for IV fluid and blood administration, power injection, and saline care and maintenance.
PowerPICC SOLO™ catheter is a universal catheter solution designed for IV fluid and blood administration, power injection, and saline care and maintenance.
4 Fr. Single-Lumen PowerPICC SOLO* Catheter
(Also Available in 5 Fr.)

5 Fr. Dual-Lumen PowerPICC SOLO* Catheter
(Also Available in 6 Fr.)

6 Fr. Triple-Lumen PowerPICC SOLO* Catheter

The Power of Purple*

One Valve. One PICC.*

The Versatility of One PICC Designed to Meet a Variety of Clinician and Patient Needs.

The Simplicity of Saline Care and Maintenance Through Innovative Valve Technology.

The Efficiency of Power Injection for Contrast Enhanced CT Scans and PICC Therapy.

Simplified Care and Maintenance - recommended weekly maintenance is reduced to a single saline flush

Continuum of Care - same flushing protocol for hospital and home health

Fewer Complications - less risk associated with improper use (e.g.)

Reduced Blood Hype - compared to open-ended catheters

Reduced Costs - decreases PICC associated heparin costs

Clamp Free Injection Therapy - eliminates the need for clamps and the maintenance challenges associated with conventional injection caps

Superior Clearance - valve back-flow after recommended saline flush

The Power of Purple*

Power Injectable PICC

Blue color symbolizes saline care and maintenance

The Power of Purple* reduces PICC associated heparin costs compared to open-ended catheters

A valve eliminates the need for clamps and the maintenance challenges associated with needleless injection caps

A valve clears after recommended saline flush

Limits risk associated with heparin use (HIT)

A Valve clears after recommended saline flush

Designed for multiple clinical conditions across the hospital

Infusion Aspiration

Gently plugs the insertion site and provides superior kink resistance

Improves patient comfort due to decreased needle sticks

Please consult product labels and inserts for any indications, contraindications, hazards, warnings, cautions and instructions for use.

The Power of Purple®

Saline.
The Simplicity of Saline®

One.
One Valve. One PICC.*

**Maximum Injection Rates** - allows injection of contrast media for CECT scans at a maximum rate of 5 ml/sec
- **Easy Identification** - catheters are clearly labeled to differentiate them from all non-power injectable PICCs
- **CMR Monitoring** - all PowerPICC SOLO catheters are indicated for central venous pressure monitoring
- **Reserve Taper Design** - gently plugs the interface site to provide superior kink resistance
- **Patient Satisfaction** - improves patient comfort due to decreased needlesticks
- **Infusion Aspiration** - allows IV fluid and blood infusion, as well as power injection, and central venous pressure monitoring

---

**Simplified Care and Maintenance** - recommended weekly maintenance is reduced to a single saline flush
- **Continuum of Care** - same flushing protocol for hospital and home health
- **Fewer Complications** - less risk associated with heparin use (HIT)
- **Reduced Blood Yellos** - compared to open-ended catheters

---

**Reduced Costs** - decreases PICC associated heparin costs
- **Clamp Free Injection Therapy** - valve eliminates the need for clamps and the maintenance challenges associated with needleless injection caps
- **Superior Clearance** - valve back after recommended saline flush

---

**THE POWER OF PURPLE®**
- **Power Injectable PICC**
- **BLUE COLOR**
- **Symbolizes Saline Care and Maintenance**
- **Decreases PICC associated heparin costs**
- **Valve eliminates the need for clamps and the maintenance challenges associated with needleless injection caps**
- **Valve clears after recommended saline flush**

---

**THE VERSATILITY OF ONE**
- **Designed to Meet a Variety of Clinician and Patient Needs.**
- **The Efficiency of Power Injection for Contrast Enhanced CT Scans and PICC Therapy.**
- **The Simplicity of Saline Care and Maintenance Through Innovative Valve Technology.**
- **Infusion Aspiration** - allows IV fluid and blood infusion, as well as power injection, and central venous pressure monitoring
- **Multiple Indications** - allows for IV fluid and blood infusion, as well as power injection, and central venous pressure monitoring
- **Multi Clinical Conditions** - for a variety of interventional radiology and CT scans
- **Interventional Radiology** - allows for over-the-wire guidewire placement

Power.
The Power of Purple*

The Efficiency of Power Injection for Contrast Enhanced CT Scans and PICC Therapy.

- Maximum Injection Rates - alone injection of contrast media for CT scans at a maximum rate of 5 ml/sec
- Easy Identification - catheters are clearly labeled to differentiate them from all non-power injectable PICCs
- CVP Monitoring - all PowerPICC® SOLO™ catheters are indicated for central venous pressure monitoring
- Reverse Siphon Design - purge plunger to maintain catheter patency
- Patient Satisfaction - improves patient comfort due to decreased needle sticks

Saline.
The Simplicity of Saline*

- Simplified Care and Maintenance - recommended weekly maintenance is reduced to a single saline flush
- Continuum of Care - same flushing protocol for hospital and home health
- Fewer Complications - includes preattached heparin use (H7)
- Reduced Blood Hesitation - compared to open-ended catheters
- Superior Clearance - valve back after recommended saline flush
- Intra - Aspiration - allows aspiration of blood, air, and central lines
- Aspiration - gently plugs the insertion site and provides superior kink resistance

One.
One Valve. One PICC.*

The Versatility of One PICC Designed to Meet a Variety of Clinician and Patient Needs.

- Multiple Indications - allows for IV Fluid and Blood infusion, as well as power injection, and central venous pressure monitoring
- Many Configurations - Bard® Single Lumen 3 and 4 Fr. Dual-Lumen 6 and Triple Lumen
- Variety of Placement Technologies - with- and non-Sherlock™ stylet
- Interventional Fluidics - allows for over-the-guide wire placement

The Power of Purple*

- Simple and Efficient - designed to meet the needs of patients and clinicians
- Cost Effective - decreases PICC associated heparin costs
- Heparin Valve Eliminates the Need for Clamps and the Maintenance Challenges Associated with Needleless Injection Caps
- Maintenance Challenges - valve clears after recommended saline flush

Infusion - Aspiration

- Simplified Fluid Administration
- Gentle Plugging of Insertion Site
- Improves Patient Comfort
- Decreased Needle Sticks

Please consult product labels and inserts for any indications, contraindications, hazards, warnings, cautions and instructions for use.
